Paper Title

A Comparative Study of LLM-Only and Retrieval-Augmented Generation for Multilingual Indian Legal Factual Question Answering

Abstract

We evaluate a legal question answering platform under three conditions: LLM only dense Retrieval Augmented Generation (RAG) and RAG with reranking. The platform uses a reviewed corpus derived test set that contains 70 question groups across seven legal domains. Each group appears in English, Hindi and Hinglish giving the platform a total of 210 rows to test. The platform always uses the Qwen3:4b model to answer every condition. The platform lets BGE M3 fetch evidence and the platform uses BGE reranker v2 m3 to reorder the candidates the platform returns. With canonical scoring the platform achieves factual accuracy of 1.90 %, 53.81 % and 55.71 % for the three conditions respectively. The platform's reranking step lifts source chunk Hit@5 from 62.38 % to 68.10 %. The platform's median latency also rises from 7.97 seconds to 28.17 seconds. The platform's accuracy gain is 1.90 percentage points and the paired question group bootstrap interval (-3.81 to 7.62 points) spans zero. The platform completes all 630 condition level requests without any failures or invalid outputs. The platform finds that English consistently outperforms Hindi and Hinglish. A pattern of repeated example like answers, on the platform makes it hard to read the baseline. Overall the platform's results support evidence assisted lookup in this configuration but the platform does not measure explanation quality, broader legal reasoning or general reliability.

Submission Questions Response

1. All authors are added during the submission process on CMT Portal.

No changes or additions to author names will be permitted later.

Agreement accepted

2. I confirm that I have removed all author names, affiliations, and any other identifying information from the manuscript to comply with the double-blind review process.

.

Agreement accepted

3. I confirm that I am not an author or corresponding author on more than 6 papers. I understand that exceeding this limit will result in desk rejection of my submissions.

.

Agreement accepted

4. Paper Formatting Compliance

I have ensured that my paper follows the provided IEEE conference template and formatting guidelines.
